

AMENDMENTS TO THE DRAWINGS

Enclosed are copies of the above-captioned instant patent application drawing “PCT SUBSTITUTE SHEET” 5/17, 6/17, and 7/17 which have been marked in red on FIGS. 5A, 5B, 5C, 6A, and 7A to show a proposed correction which interchanges the rotation arrow designations G and G’ for lid rotation.

The proposed correction does not add new matter because the proper operation of the screwing on and off rotation directions represented by the arrows was correctly described in the specification as originally filed and was properly shown in the originally filed drawing FIGS. 10 and 13.
